...

## VGA to Video Converter with Video Overlay

The Grand MagicView is a high-resolution VGA to video converter with video overlay. The converter includes the award-winning Astound 5.0 presentation suite. Overlay fully customizable computer-generated text and images over existing video for output to a TV or VCR. From kiosks and message boards to prosumer-level videography, the Grand MagicView offers ease of use and superior quality without the limitations of traditional video character generators.

### KEY FEATURES
